

**General Notes**

The information depicted on the map represents the results of surveys made on the date indicated and can only be considered as indicating the general condition of that place. Unless otherwise noted on this map, all depths and soundings are in feet and referred to the International Great Lakes Datum 1985. The depths and soundings are not to be used for navigation. The data were collected from the State of Michigan Department of Transportation, Division of Transportation Planning and Design. The State of Michigan Department of Transportation, Division of Transportation Planning and Design is the data provider. To view the data, please visit the following URL: <http://www.michigan.gov/transportation>. To view the color version of this map, please visit the following URL: <http://www.michigan.gov/transportation>. Social media may be distorted.
